SUMMARY

Software Engineer (fresher) with 1 internship, 3 end-to-end projects (full-stack, ML, and DevOps CI/CD), and certifications in Google Cloud Computing and Generative AI, skilled in full-stack development, REST API design, containerisation, and cloud infrastructure across Java, Python, and Node.js ecosystems.

WORK EXPERIENCE

Full-Stack Web Developer Intern — Infidata Technologies Pvt Ltd

Jan 2024 – Apr 2024

MEAN Stack (MongoDB, Express.js, Angular, Node.js) | Bengaluru

- Developed and refactored Node.js/Express.js server-side modules to address slow API response times caused by unoptimised middleware chains, achieved ~90% improvement in backend throughput and system stability.
- Architected and shipped a production-grade full-stack web application by integrating Angular frontend with a RESTful Node.js backend and MongoDB database, solving fragmented data flow between frontend and server layers.

TECHNICAL SKILLS

Languages: Java (Proficient), Python, SQL, JavaScript, HTML5, CSS3

Cloud & Infrastructure: Google Cloud Platform (GCP), Amazon Web Services (AWS), Docker, Docker Compose, Jenkins, CI/CD, Linux

Full-Stack: Angular, Node.js, Express.js, React.js, MongoDB (MEAN Stack)

Databases: MySQL, MongoDB, JDBC

APIs & Tools: REST API Design, Postman, Git, GitHub, XAMPP, Streamlit, Jest, Supertest

Core CS: Data Structures & Algorithms, OOP, OS (Linux), DBMS, Computer Networks, SDLC, Cloud Computing

PROJECTS

LeaveFlow — Employee Leave Management System (DevOps Project)

[link](#)

Docker, GitHub, Jenkins, CI/CD, Jest, Supertest, Nginx | 2026

- Containerised a Node.js/Express REST API using Docker and Docker Compose to eliminate environment inconsistency, configured a multi-container setup with Nginx reverse proxy, ensuring consistent behaviour across development and production environments.
- Designed an 8-stage Jenkins CI/CD pipeline (Checkout → Install → Test → Audit → Docker Build → Push → Deploy → Health Check) to fully automate end-to-end delivery, eliminated all manual deployment steps and enforced quality gates at every stage via automated test and audit runs.
- Engineered a role-based leave management REST API (8 endpoints) supporting Employee and Manager workflows including leave application, approval/rejection with comments, and balance tracking, validated all endpoints with Jest and Supertest achieving full test coverage.

Traffic Prediction System Using Hybrid ML Model — Mini Project

[link](#)

Python, Machine Learning, LSTM, XGBoost, Random Forest, REST API, Streamlit | 2025

- Built a city-level traffic prediction system to solve the challenge of single-model approaches failing to capture both short-term fluctuations and long-term traffic patterns, engineered a hybrid meta model combining 4 ML algorithms (Random Forest, XGBoost, Extra Trees, Linear Regression) with an LSTM deep-learning network.
- Encountered poor prediction accuracy on raw data due to high-noise weather and temporal features, designed and implemented a multi-stage feature engineering pipeline covering historical traffic, weather, and temporal variables, reducing MAE and RMSE to achieve ~93–95% prediction accuracy across test datasets.

Freelancing Project Tracking System — Full-Stack Java Desktop Application

[link](#)

Java, Java Swing, JDBC, MySQL, OOP, RBAC | 2025

- Built a desktop project management application using Java Swing and MySQL to solve the problem of freelancers manually tracking project states across email and spreadsheets, centralised all project data into a single system with 3 defined lifecycle stages (Pending → Accepted → Completed).
- Identified a security gap where all users accessed the same data view, implemented a role-based access control (RBAC) system with 2 user roles (Admin and Client), enforcing separate login flows, permission scopes, and personalised dashboards per role.

EDUCATION

Bachelor of Engineering — Information Science & Engineering

2024 – 2027

BMS Institute of Technology, Bengaluru | CGPA: 8.3 / 10

Diploma — Computer Science & Engineering

2021 – 2024

Government Polytechnic College, Kampli | CGPA: 9.3 / 10

CERTIFICATIONS & ACHIEVEMENTS ([link](#))

- Google Cloud Computing Fundamentals - Google Cloud Skills Boost (Badge Earned, 2026) - [link](#)
- Master in Generative AI - Udemy
- Full Stack Web Development Intern - Infidata Technologies
- Ranked in top 4% statewide in DCET (Diploma Common Entrance Test), Karnataka
