EDUCATION

Bachelor of Engineering in Information Science and Engineering at BMS Institute of Technology, Bengaluru	2024-2027
CGPA: 8.3	
Diploma in Computer Science and Engineering at Government Polytechnic College, Kampli	2021-2024
CGPA: 9.3	
SSLC in Bright Way Higher Primary School, Kampli	2020-2021
Percentage: 85.6%	

WORK EXPERIENCE

Full Stack Web Developer Intern, Infidata Technologies Pvt Ltd	JAN – APR, 2024
- Utilized HTML, CSS, JavaScript to enhance user interface, ensuring a smoother user experience. - Developed server-side logic, resulting in ~90% smoother system operations. - Delivered a complete full-stack web application by integrating frontend and backend components, ensuring successful and seamless operation.	

PROJECTS

Freelancing Project Tracking System – Full Stack Java Desktop Application [Repo link ↗](#)

Skills: JAVA, JDBC, Swings, MySQL

- Designed a Java-based desktop application using Java Swing and MySQL to efficiently manage and track freelance projects.
- Developed a secure role-based login and access control for 2 user roles, ensuring personalized views and operations for both Admin and Users.
- Implemented a project assignment, status tracking across 3 lifecycle stages (Pending/Accepted/Completed), and feedback features to streamline project workflows.
- Integrated JDBC with MySQL for efficient database operations, including main 4 tables are user, credentials, projects, and count of project.
- Created a responsive dashboard for Admin and Clients, enabling real-time monitoring of project statuses and client actions.

Traffic Prediction System Using Hybrid Model – Mini Project [Repo Link ↗](#)

Skills: Python, Machine Learning, Deep Learning (LSTM), Data Analysis, APIs, Streamlit

- Engineered a hybrid traffic prediction system combining 4 ML models (Random Forest, XGBoost, Extra Trees, Linear Regression) with an LSTM network, achieving ~93–95% prediction accuracy across test datasets.
- Implemented data preprocessing and feature engineering pipelines for historical traffic, temporal, and weather data, reducing prediction error with lower MAE and RMSE values.
- Integrated real-time weather and traffic flow data using external 2 APIs to enable context-aware traffic forecasting for city-level and route-level analysis.
- Built city-wide and route-specific traffic prediction modules capable of identifying congestion levels (Low, Moderate, Heavy) with high R^2 scores indicating strong model fit.
- Deployed an interactive Streamlit dashboard to visualize real-time predictions, congestion zones, and model performance metrics, improving interpretability and decision support.

TECHNICAL SKILLS

Languages: Java (Proficient), Python, JavaScript, SQL

Full Stack Development: HTML, CSS, JavaScript, Java Backend, PHP

API: REST API

Tools: Git, GitHub, Docker, Postman, Xampp, MySQL

Frameworks: Java Swings, React, PHP

Core Concepts: Data Structures and Algorithms, Object Oriented Programming, Operating Systems (Linux), Database Management System, Computer Networks, Cloud Computing, Computer Architecture Fundamentals

ACHIVEMENTS & CERTIFICATES

- Secured Top 4% rank** in the DCET competitive examination.
- Certified in **Full Stack Web Development** (Infidata Technologies), **Java Skilled Programming** (Hack Veda), **Technology Job Simulation** (Deloitte), and **Master in Generative AI** (Udemy). [view ↗](#)

SOFT SKILLS

- Good in structured troubleshooting and data driven reasoning.
- Ability to adopt new environments.
- Clear technical communication with team coordination and leadership mindset
